FAST GO-LIVE WITH CLOUD NATIVE APPS

You want to go live as soon as possible?

You need a quick prototype for your idea?

You have to catch up to a competitor's feature set very fast?

You have to meet a tough deadline?

MODERN CLOUD TECHNOLOGIES ENABLE RAPID DEVELOPMENT

- Together we find the best tech stack and define the MVP scope.

GO LIVE

- We write the software in short cycles (1 - 2 weeks)
- We set up the runtime in the cloud

- We extend the functionality
- We provide service and support

We focus on your business features by outsourcing most infrastructure work to the cloud provider

- Managed services for databases and messaging
- Serverless business logic with FaaS
- On all three major cloud providers

YOU GET

- Quick results in the shape of usable software
- Strong support in defining the right feature set that is needed for going live
- Gradual handover to your development team
